Are false alarms costing you?

Spending too much time dealing with un-wanted fire alarms?

DorWatcher is the answer!

Hoyles DorWatcher alarm helps ensure kitchen fire doors are kept closed preventing cooking smoke from causing false alarms.

- **Simple and economical**
- **Easy to install and maintain**
- **Robust and tamper resistant**
- **No user training required**
- **Battery or mains powered**
- **No more propped open doors**
- **Protective cage and Anti-Tamper fixings available**

Testimonial

Following the installation of the DorWatcher alarms, **John Allum Buildings Manager at Queen Mary University of London** says, "With regard to results, I can say that there has been a dramatic reduction in the number of un-wanted fire alarms and that London Fire Brigade are happy with progress made."

Matt Cartwright Hall Manager at City University London commented "We have been very happy with the DorWatcher alarms....we have experienced approximately 60% reduction in fire alarms since their installation...."

Swansea University Head of Residential Services Gareth Atkinson says "We can confidently state that the DorWatcher alarms have drastically reduced the number of occasions when we find kitchen fire doors propped open, this is very reassuring to us and we have had very positive comments from the Fire Service about the DorWatcher. We spent a considerable amount of last year's safety budget on the DorWatcher units and are pleased that this decision has been vindicated."

Exitguard

EXITGUARD is the ideal solution for security of fire exit doors in all types of public buildings, satisfying the requirements of both fire and security officers. An integral high power sounder is activated when the door is opened to warn those in the vicinity that security has been breached. Supplied with either keypad or keyswitch the Exitguard is simple to install and use, offering the very best in door alarms. Straight out of the box it's Plug n' Play

- 108db high power sounder on all models.
- No programming needed in 90% of scenarios.
- Six Selectable tones.
- Chime facility.
- Output for connection to monitoring systems.
- Fire Door checker facility.
- Two year manufacturers guarantee.

Deafgard

The Equality Act 2010 states that service providers such as hoteliers and suppliers of sleeping accommodation are legally obliged to make reasonable adjustment for the disabled, which includes deaf and hard of hearing people. In the event of fire, deaf or hard of hearing people might not be able to hear the fire alarm, especially when they are asleep.

Deafgard is a battery powered, wireless unit with a pad attachment that simply goes under the pillow of the sleeping person. Deafgard is listening for a continuous fire alarm of 75dBA or higher. When the fire alarm sounds the pillow pad vibrates, high intensity LED lights flash and an LCD screen displays 'fire'.

- No installation required
- Wireless technology Ensures compliance with elements of the Equality Act 2010
- Fail-to-safe dual battery supply
- Alarm clock facility for deaf or hard of hearing people
- Adjustable sensitivity Complies with the relevant parts of BS 5446-3 CE marked
