

Dado LED Installation Instructions

1. Mount the channel, end base and switch as normal. Fix a mounting sticker centrally to the front of the LED strip near the wiring end.

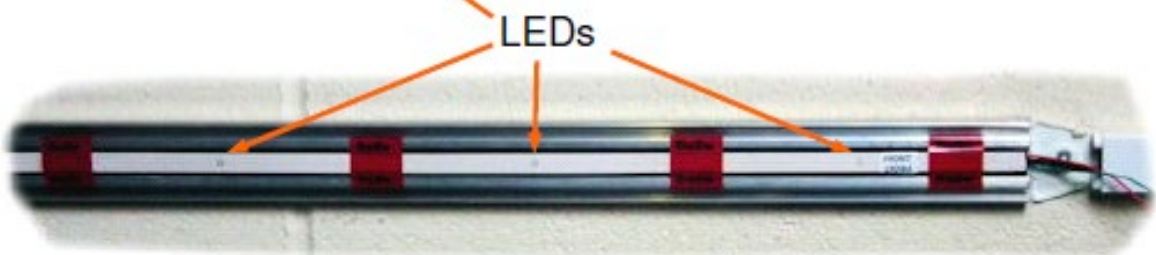

2. Centralise the LED strip on top of the switch and press each end of the sticker onto the aluminium channel.

3. Push the overlapping ends of the sticker into the cover-mounting recess.

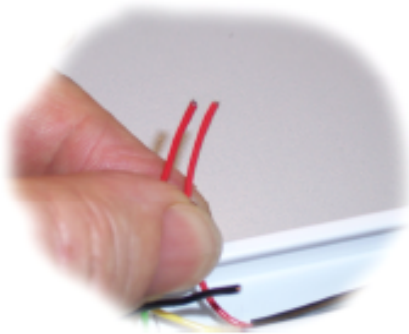

4. Repeat the procedure fixing mounting stickers about every 150mm to 300mm. Ensure the mounting stickers do not obstruct the LEDs

5. Connect the external wiring for the LEDs ensuring that +ve voltage is connected to the red wire and –ve to the green wire

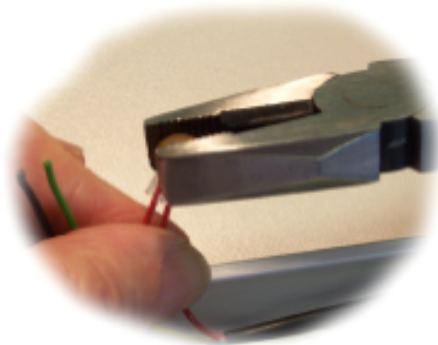

Do not strip the insulation.

Insert the wires fully into the grease-filled IDC connectors

Squeeze the connector with pliers to make the connection.

Visually check there is a good connection with both wires
