

## Single Gang Multi-Function Buttons with Integral Sounder and LEDs – S1760P range

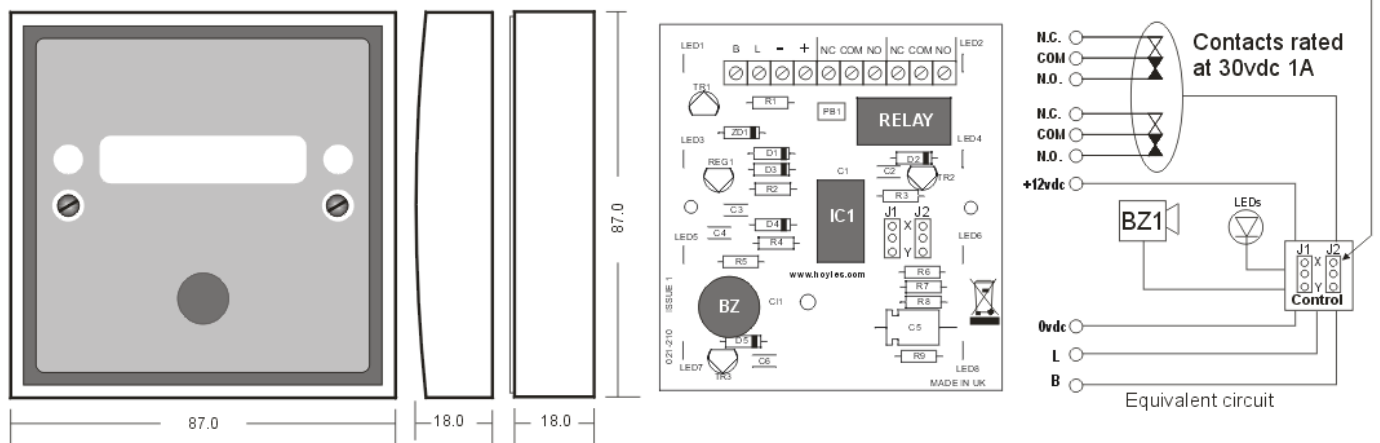

**S1760P** (R, G, Y or B) Button with 2 x LEDs (Red, Green, Yellow or Blue), integral sounder and engineer changeable label. The buttons can be programmed in a number of different ways with on board jumpers. Supplied with an ABS back box for surface mounting but can be semi flush mounted using a single gang galvanised back box.

The contacts are configured by jumpers J1 and J2 as follows:

<b>Momentary Action Mode</b>	Contacts change when button is pressed and restore when button is released.	J1at X, J2 at X
<b>Dwell Mode</b>	Contacts change when button is pressed and restore 5 seconds after the button is released.	J1at Y, J2 at X
<b>Commutating Mode</b>	Contacts change when button is pressed and restore when the button is pressed again.	J1at X, J2 at Y
<b>Double Press Mode</b>	Contacts only change if button is pressed twice within 1 sec or held pressed for 2 secs. This helps prevent accidental operation. They restore 5 secs after the button is released.	J1at Y, J2 at Y

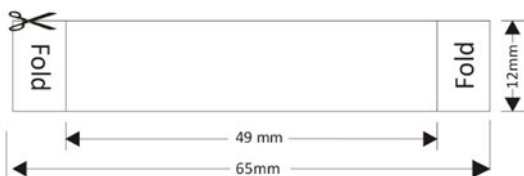

Link L to -ve to disable the LEDs

Link B to -ve to disable the sounder

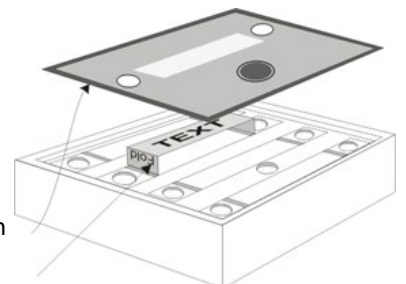

The S1760P comes supplied with a selection of pre-printed paper labels ready to fit. A plain label is also supplied, customisation is simple with a labelling machine.
