

Door Interlock Solutions for Cleanrooms

Hoyles are experts in the design and manufacture of door interlocking systems for the Cleanroom environment. We have more than 30 years' experience providing door interlock systems worldwide for the most demanding of industries including military, government, retail, financial services, and cash handling as well as cleanroom. Hoyles can deliver door interlocking systems to meet any requirements in your cleanroom project.

Interlock any standard door with any kind of lock. Rapid roller doors, automatic sliding doors and powered door operators are all catered for. Where required any access control system or fire alarm can be easily integrated. Other operating modes for functions such as change room privacy and lock down for pressure stabilisation or decontamination are standard. Call our dedicated team today for the best help and advice available for your door interlocking requirements.
