

Cig-Arrete

CSA-FDW24

The weatherproof **CSA-FDW24** is designed for the detection of unauthorised smoking in external areas and will detect a flame lighting a cigarette with 120-degree field of view. The module is designed for single applications and will detect a 25mm cigarette lighter flame at 6 metres within 1 second. This system is specifically designed to be installed outdoors and carries a IP65 rating.

Typical applications include open areas, building entry/exit points, used in hospital entrances, ambulance bays, factory gates, reception areas, school shelters and many more public places. Fully programmable with a simple handheld remote **CSA-IR2**.

Dimensions (mm) 198 L x 152.5 W x 76.2 H

Weight 0.73kg

All of the SD Evolution units require a CSA-IR2 remote control.

One CSA-IR2 can control multiple units.

You do not need one remote per unit.

Benefits

- Plays pre-programmed voice files
- Housed in a IP54 weatherproof box
- Can be powered by 24Vdc or AA batteries
- Up to 100 messages can be programmed
- Selectable time delays between messages
- Hi-Resolution voice playback
- Used in hospital entrances, ambulance bays, factory gates, reception areas, school shelters and many more public places.
- Manufactured in the UK

Product Features

- Time delays between messages are selectable via the remote programmer to ensure that the message is broadcast at the right time.
- Up to 100 messages can be pre-programmed and selected either individually or sequentially where each message in the list is played in turn on each activation.
- Contains a Windows® based file structure which allows simple 'drag and drop' file copying for ease of programming.
- New SmartWave© hi-resolution voice playback software produces crystal clear hi-fidelity audio files to be broadcast in any location.
- Cig-Arrete® SD Evolution units can be powered simply by 8-28Vdc or by 4 x AA batteries (not supplied)
