## General Purpose, Multi-indicator, Switched-Mode, Power Supplies

The illustration shows a D1545-C fitted with an optional D15X4-BNC output splitter

Dycon's D154X-Series units are 1, 2, 3 and 5 Amp switched-mode power supplies with three separate LED indicators that show the operational status of the unit. A green LED indicates that the Mains AC power is present, an orange LED lights when the unit is operating on standby battery power and a red LED lights if the electronic fuse has been tripped. These power supplies are protected against electrical 'spikes' caused by the switching of highly inductive loads (door strikes and locks) and they remove the chance of inductive kickback blowing a fuse and causing a door to remain closed or open, a frequent cause of personnel delays and expensive engineer call outs. The range also features intelligent and capacitive load switching surge protection and snubbing. Optional D15X8 8-way splitters and D15X4-BNC, 4-way splitters with 4 BNC loopthrough connectors, are also available. Connected to the power output, a D15X8 provides up to 8 individually fused outputs and indicators, the D15X4-BNC can power up to 4 cameras with loop-through connections for signals, making it ideally suited for use in powering CCTV systems
