

## Panic Button PAB-W & PAB-S

### Double push panic button with no resistors

Security Grade 3 Environmental Class 2

Manufactured to EN 50131-1:2006+A3:2020 | PD6662:2017

### Wiring

Traditional (4 Wire) – Place a single link over the NO or NC pins depending on the desired operation. Use all 4 terminals as marked.

- Attach your tamper wires to the tamper terminals.
- If the lid is removed the tamper will activate.
- Attach Alarm wires to the Alarm Terminals.
- Once the button is pressed in the circuit will be broken.

### Installation

- Screw the unit base to mounting surface.
- Carefully fit the lid, ensuring no wires are snagged. Screw down.
- Operation: Push both buttons inwards. The microswitch will only operate when both buttons are pushed simultaneously.
- Latching units may be reset by using the reset key (supplied).
