

Panic Button PAB

Security Grade 2 Environmental Class 2

Manufactured to BS EN50131

- 1) Screw the unit base to mounting surface
- 2) Connect your alarm circuit wires to the PA contacts. This will create the circuit. Once the button is pressed in the circuit will be broken
- 3) Attach your tamper wires to the tamper terminals. If the lid is removed the tamper will activate. Other terminals are spare
- 4) Carefully fit the lid to the central post on the base
- 5) Ensure no snagging occurs
- 6) **Operation:** Push End button inwards. The microswitch will only operate when both buttons are pushed simultaneously
- 7) **Reset:** by using the reset key (supplied)
