

## Wireless Ceiling Pull Cord

S1600-W

Wireless ceiling pull cord with re-assurance LED and a 2.5m long cord.

Battery status is monitored by the control panel. When the battery requires replacing, the control panel will indicate a fault. When fault is indicated replace all batteries within the system. The system should be tested monthly and we recommend that all batteries are replaced every twelve months.

Red ceiling pull cords are supplied as standard in all of our Aidalarm Disabled toilet alarm kits. If you are installing a ceiling pull cord into a disabled toilet it should be Red.

It is considered against best practise to install a non anti ligature pull cord into a mental health unit due to the risk it poses. If you require Anti-ligature pull cords please ask for information on our S1600AL range.

**This wireless unit is specifically designed for use with our Wireless Aidalarm Disabled Toilet Alarm systems.**

Specification	S1600-W
Led Current	N/A
Switch Contacts	N/A
Battery Type	CR123 Type Lithium
Visual Indication	Red LED
Integral Sounder Level	N/A
