

Relays

S312T, S312T-24

Transistor driven timer relay module. This device accepts a variety of input conditions (Voltage, Logic, Closed Circuit and Open Circuit) for interfacing various signals via voltage free DPCO contacts. The action of the device can be delayed by between about 3 and 60 seconds. Adjustable with the on board potentiometer. This can be a useful feature where it is necessary to delay one action slightly to allow another.

Specification	S312T & S312T-24
Led Current	N/A
Switch Contacts	DPCO contacts rated at 2A
Visual Indication	1 x Red
Integral Sounder Level	N/A
Supply Voltage	12vdc or 24vdc depending on version
Supply Input Current	40 mA max
Tamper	N/A
Material	PCB Module with self-adhesive backing
Dimensions	57 x 47 x 14 mm
Weight	0.024kg
IP Rating	N/A
Approvals	UKCA and CE marked, ROHS compliant

Benefits and Features

- Self adhesive backed for easy mounting
- Four holes also provided for permanent fixing
- Adjustable 3 - 60 seconds
- Manufactured in the UK
