# Weatherproof Chatterbox

The Weatherproof ChatterBox Talking Alarm Module is a self-contained audio module with loud speaker. Typical uses include a voice sounder for an intruder alarm, building welcome messages, cctv systems and general alarm messages. The unit also has a built in queue call system that will queue requested messages if one is already being played. A mono RCA socket is provided to allow the unit to be connected to an external amplifier. PIR movement detectors are available to trigger on movement.

Please visit our website for a full list of free of charge recordings. If you don't see the wording you require a professional recording service of up to four short voice messages is available, please use product code TAMREC.

Please note if you choose to record messages yourself the format of any sound file used in the Chatterbox *MUST* meet the specification detailed in the installation instructions. Failure to comply with the required format may cause damage to the unit and will not be covered by warranty.

- IP65 Rated Weatherproof voice module for external use
- Can play any type of sound, be it tones, music or voice
- 12vdc, mains and PoE versions available
- Eight different sounds can be played by activating one of the eight inputs
- Messages queued if multiple inputs are triggered
- Clean contact relay output switches when file is playing
- Mono RCA socket allows connection to external amplifier
- Inputs are normally open and must be closed to activate a sound
- SD Memory card included
- Professional recording of up to four short voice messages available
